

\$LILO whitepaper

Introduction

The \$LILLO is a token created in parallel with our NFT projects. \$LILLO will be fueled by projects provided by the lounge in order to create an everlasting buying pressure through the rewards contract and fees. The theory is simple. You hold \$LILLO and get Auto-Staking-Rewards in \$BUSD. All upcoming projects will pay reflection in \$LILLO and you get double profit while holding.

This token will be created on the BSC (Binance smart chain).

We have chosen to use the Binance smart chain for our NFT collections as well as for our token since the fees are lower than on ETH. Indeed the BSC blockchain allows everyone to invest without being blocked by major fees that can be very annoying for small wallet!

Why BSC ?

OUR VISION

Our token is based on the support of our community!

Reward systems in \$LILLO will be put in place to have many advantages of holding your \$LILLO.

Indeed, our NFT collections allow us to have more funds to invest in marketing in order to promote our token to the whole world.

In addition, projects will be created with \$LILLO rewards to get even more volume on our token and to get people talking about us!

Tokenomics

Total supply
1,000,000,000 \$LILO

Buy tax 5%:

- 1% BUSD reflection
- 2% Marketing
- 1% Liquidity
- 1% Development

Sell tax 15%:

- 2% BUSD reflection
- 5% Marketing
- 7% Liquidity
- 1% Development

Explanation of our tokenomics:

BUSD reflection

Having rewards in another token than the base token avoids dumping related to too much selling. It also encourages people to reinvest their rewards in our \$LILLO. Finally, we have chosen reflections in BUSD which is a stable coin (a crypto backed by the dollar) and therefore allows you to recover your rewards without the risk of losing any \$ even in case of a bear market!

Liquidity

Liquidity is something very important for our crypto. Indeed it allows a greater stability of the token and the possibility of making quite large investments without a too high price impact. It is therefore very important to have sufficient liquidity and that is why it is the most important tax on the sale!

Marketing

The marketing fee will allow us to have a bigger budget to reach more and more important targets and to be present on all platforms in order to be known by everyone! We will keep you informed of the major marketing operations that will accompany our project!

Development

Finally the last tax will be concerning the development of our projects on a technical aspect apart from the marketing we will need to finance projects related to our token and this tax will be intended for that! You will also be kept informed of future major projects in due time!

**What about
Our future ?**

Roadmap

Q1 - 2022

- Listing \$LILLO on pancakeswap
- Listing on CoinGecko
- Listing on CoinMarketCap
- Marketing to expand our community on our various social networks
- Reach our first 2000 holders
- Introduction of new projects with \$LSL reflection

Q2 - 2022

- Listing on some exchanges
- Development of projects around our token in order to obtain more visibility and reward for our holders
- Big marketing actions
- Reach 10 000 holders

Roadmap

Q3 - 2022

- Listing on major exchanges
- Our NFT collections and our token are trending on as many social networks as possible to create more and more hype
- Reach 25 000 holders

Q4 - 2022

- Big things coming... be patient

How to buy ?

You can buy LILO on pancakeswap. In addition, you will also soon be able to buy \$LILO on exchanges. This exchange list will be updated often with each new listing!

- We will show you how to purchase \$LILO on PancakeSwap.

Step 1

Go to the following link:

<https://pancakeswap.finance/swap?outputCurrency=> And past our contract:
0x401e15af5edb56be940d5a16b948f9436d2944f0

Step 2

Click "Connect Wallet."
Click on your wallet
(like Metamask or TrustWallet)

Step 3

Click on the little nut to set the 5% fee for when you buy.

Step 4

Follow the prompts to finish the connection process.

**Some
informations
about our
other major
projects**

NFT

We currently have two major projects in NFT and a third collection that will be available soon.

NFT collection: Decentralions

01

This collection represents 10 000 lions that are each unique in order to create a rarity for each mint lion since there is no lining. Rarity has been added to this collection and it allows you to see the rarity of your lions based on the different traits and clothing etc they have.

Website: <https://decentralion.com>

NFT collection: Valkyries

02

These 10'000 Vector Graphics are real art pieces. Each is unique and beautiful and will live on the blockchain for eternity. You will find here many different weapons but also different bodies and heads that allow to create a total originality. Go back to the history of the valkyries through these incredible NFT! We all become addicted to these beautiful designs.

NFT collection: Cosmic Apes

03

Coming soon...

Website: [coming soon...](#)

These 3 collections of NFT are developed on the BSC as said before in order to avoid too important expenses and thus to allow everyone to obtain one or several NFT of these incredible collections!

We also have parallel token projects with rewards in \$LILLO that will be released in the coming months and will be updated in the next update of our whitepaper! To make sure you don't miss anything, join us on our different networks!

Conclusion

You could see here the ambition of our team and our desire to do well. We call for the support of our community in each of our projects and future projects to keep the hype going and get more and more recognition.

We believe that crypto is the future of the financial world and NFT is a growing market with a lot of room for improvement, that's why we have projects in both markets!

We would like to thank all those who are already helping us and those who will help us to reach the top together.

Conclusion

This is version 1 of our whitepaper. There will be new versions in the future in order to modify some information concerning the listings and the progress of our new projects. But also additional information and an even more complete whitepaper to get the understanding of all.

Thank you for reading our whitepaper and if you have any questions, don't hesitate to ask our team politely on our social networks, especially on Telegram.
